

Circular & Sustainable Nature

Informative Guide

How can I interpret this data?

Within each box we will find different data that will provide to us a variety of information about each of the plant assets.

In product we will find the common name. In the INCI section the nomenclature.

In employment we will obtain a small text where it is explained which points are most characteristic of the asset.

In aspects of interest we will determine where each asset comes from. We can find from native assets to imports. We will also find an image that will indicate its flowering time depending on the corresponding icon.

Summer

Winter

Spring

Autumn

biogründl
station

Finally, in Area we will find the location according to the corresponding relationship with the history in the form of an image.

Area 0:

Catalan
Farmhouse

The people of our territory are the cradle of our past. That is why we reflect the Catalan Farmhouse as that rural era that was lived in the small towns of the area, bringing with it food, plantations and a characteristic way of life that made this one of the many roots that have come down to our present.

Area 1:

Prehistory

Prehistory is known for being the first stage of our origins. In the agricultural activity was understood as a way of being able to live from the crops without having to be nomads.

Area 2: Ilercavonia

Region of Iberian origin, which is known for being one of the first commercial transport routes in our peninsula. The Ilercavones adopted new crops and plants that revolutionized our agricultural customs.

Area 3: Imperial Tarraco

Tarraco was one of the most important and influential cities, colonies and capitals of ancient times. The progress that this city gave us made our territory a zone of progress. It got its beginnings as a Roman colony and was consolidated as one of the three great capitals of the Hispanic Empire. Bringing all the Roman prosperity that so enriched us.

Area 4: Visigothia

The Visigoths were a large group of Germanic peoples who settled in the Iberian Peninsula and brought prosperity to the land managing their own cultivation. For the Visigoth people, agriculture was of great importance. Their food depended on their crops. They brought with them prosperity and food that many years later would be adopted as native plantations of our land.

Area 5: Al-Andalus

The legacy of this reign in the Iberian Peninsula has made this a rich area in many ways. From culinary traditions to its own ingredients such as oil and many more active vegetables, make this one of the times where more new elements were introduced into our culture.

Area 6:

County of Barcelona

The county received many influences from different distinct territorial zones. Within its roots we find the Visigoths, Italians, Aragonese, Moors and French people. The cultural and agrarian plurality brought many novelties that our ancestors took advantage of to make the peninsula a richer area.

Area 7:

Renaissance

The Renaissance is known to be one era of rediscovery and transition between the Middle Ages and the progress towards the Modern Age. With the discovery of America, European explorers and traders created plantation systems to produce new foods that were sold as luxury goods.

Area 8:

Baroque

Time of artistic splendor that constituted advances in all sectors. The increase in imports and their quantities made this a time of agricultural prosperity.

Area 9:

Art Nouveau

Art Nouveau was a time of great innovation that cradled part of the Catalan territory as one of the big centers of the movement. This is how the cities of the area prospered and grew a lot thanks to new designs and new technologies that helped improve conditions for things as basic as harvesting.

Areas

Area 5: Al-Andalus

Area 4: Visigothia

Area 3: Imperial Tarraco

Area 2: Ilercavonia

Area 1: Prehistory

Area 0: Catalan Farmhouse

Area 8: Baroque

Area 9: Art Nouveau

Area 6: County of Barcelona

Area 7: Renaissance

The tour begins in **area 0**, dedicated to the “**Catalan Farmhouse**”. It is where we have the building and the space in front of the entrance door. In front of the door we have the typical palm tree, also mulberry trees for shade, a lemon tree and an orange tree, among others.

Area 0 Catalan Farmhouse

- | | |
|------------------------|-----------------|
| 4 Almond-Tree | 3 Olive Tree |
| 254 Canary Island Palm | 128 Orange Tree |
| 129 Lemon Tree | 245 Pittosporum |
| 15 Mulberry Tree | 276 Rice |
| | 328 Sorrel |
| | 30 Willow |

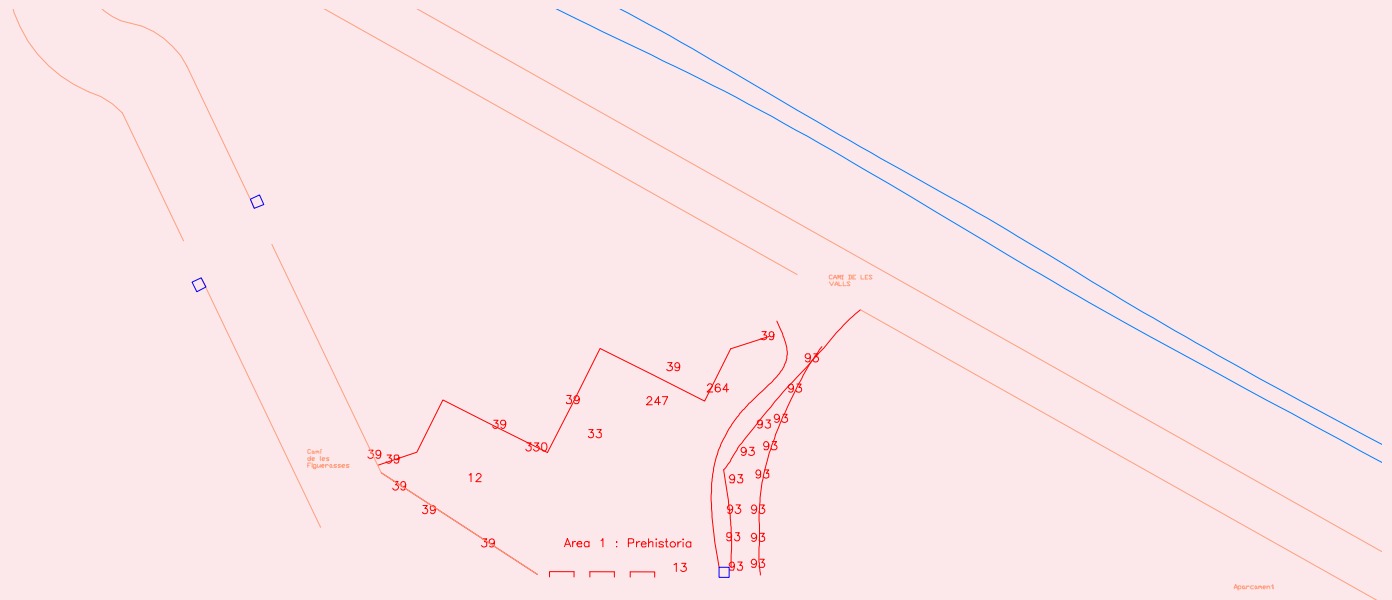

We head towards the back of the farmhouse:

Area 1: "Prehistory": Plants that should already be there at that time, such as the Kermes oak, the Madroño, the Sabina... We must highlight, as a curiosity, but the Ginkgo Biloba. Although it is native to China, we have placed it here because it is considered a living fossil, as it is not yet extinct. It is the only surviving species of its genus, family, and order.

- 13 Arbutus
- 247 Broom
- 39 Cornel
- 12 Ginkgo
- 93 Ivy
- 264 Kermes Oak
- 330 Kidney Weed
- 33 Phoenician Juniper

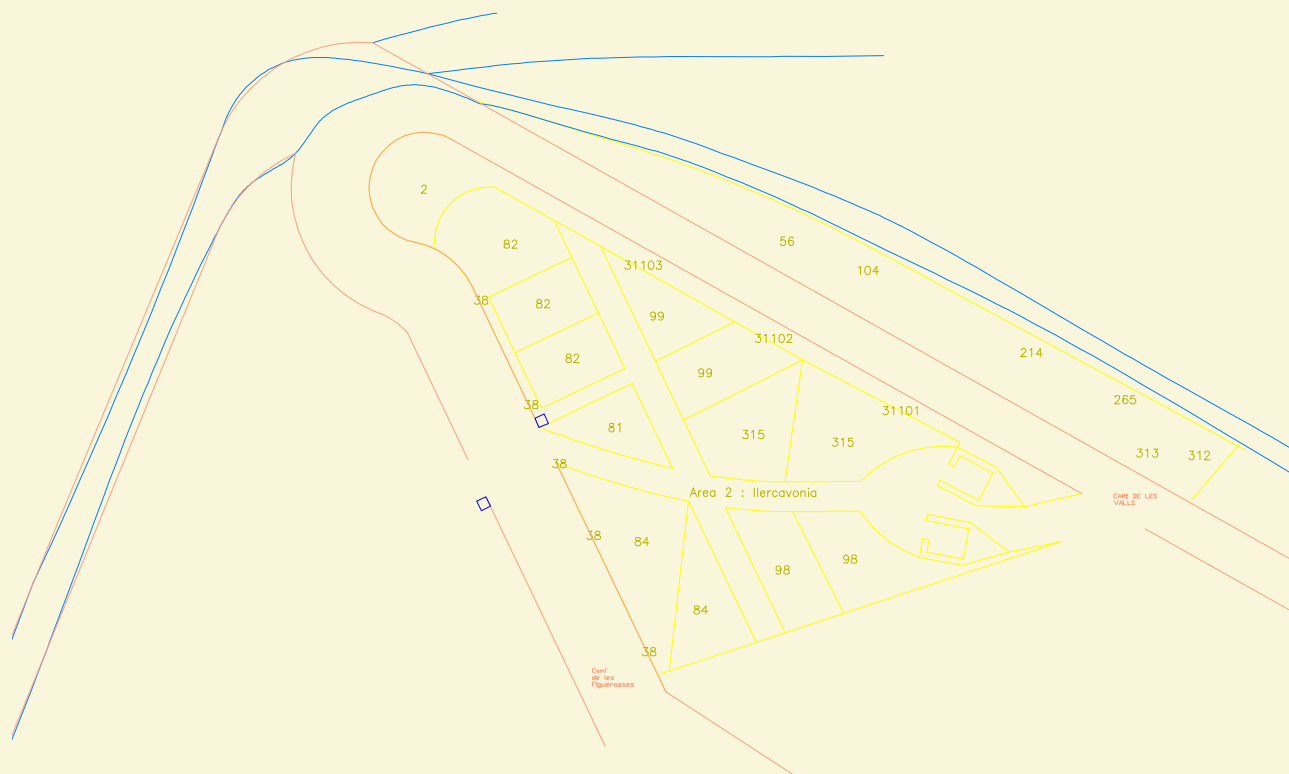

Area 1 Prehistory

313 Aloe Maculata All.	98 Lentil
82 Barley	265 Oak
104 Carob Tree	81 Oats
99 Chickpea	214 Olive
56 Eternal Flower	312 Torch Aloe
31103 Fercal	315 Vetch
2 Holm Oak	84 Wheat
	38 Yew

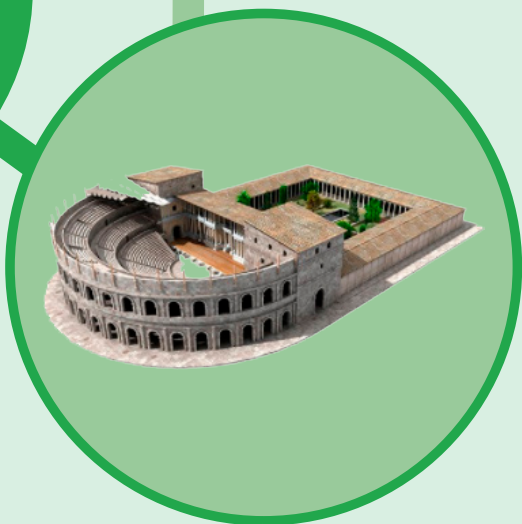

We continue along the path of "Les Figuerasses": On the right...

Area 2: "Ilercavonia": Mostly, they grew cereals and legumes: barley, wheat, oats... Chickpeas, lentils, vetches... It is also worth noting the holm oak that spontaneously grew in the place and that we have been taking care of.

We also mention the reproduction made to scale and in the same orientation as the original, of the two defense towers that we find at the entrance of the Iberian town of "Banyoles", in the same TM of Tivissa and about 3 km from the garden, in straight line.

Area 2 Ilercavonia

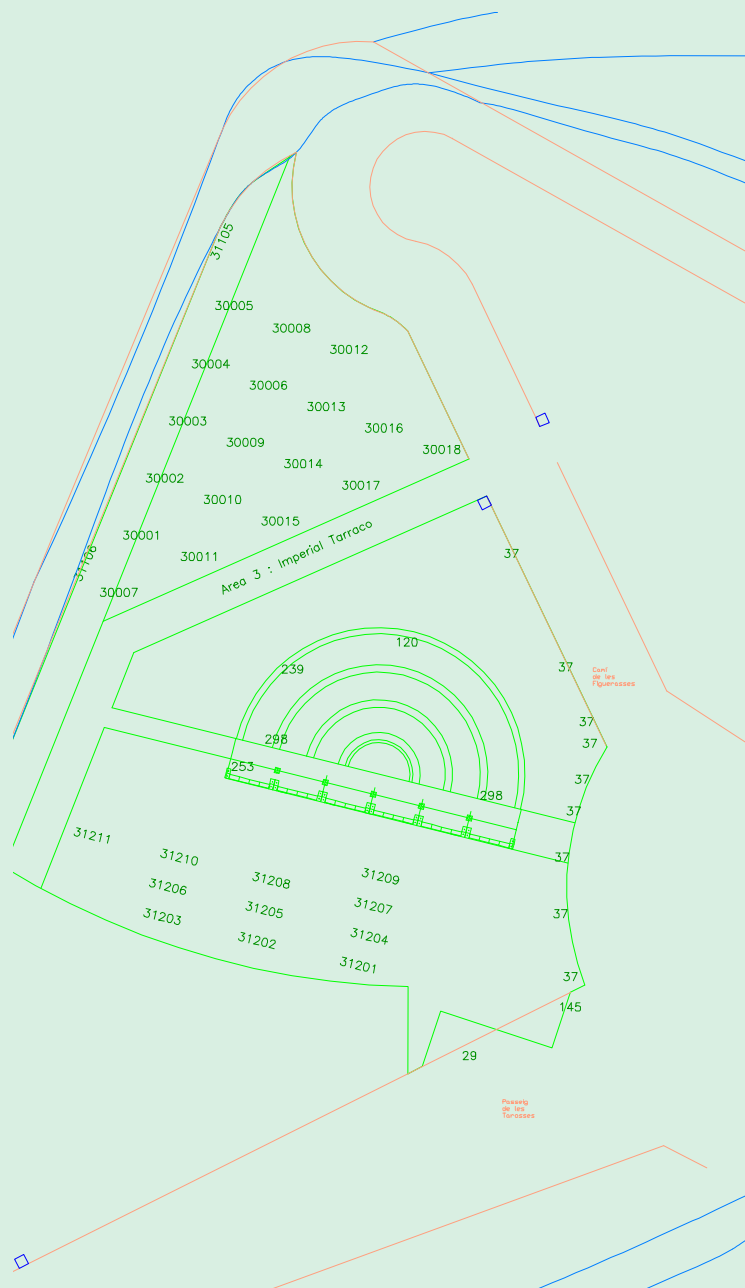

To the left of the path of "Les Figuerasses"...

Area 3: "Imperial Tarraco": The vineyard and the olive trees occupy most of this space, as a collection of varieties.

We have also made, to scale and in the same orientation, a reproduction of the Roman theater of Tarragona. Its usefulness is the presentation of audiovisuals, conferences, etc., with capacity for about 100 people.

Area 3 Imperial Tarraco

- 31211 Alicante Bouchet
- 31202 Cabernet Sauvignon
- 31207 Carignan
- 37 Common Boxwood
- 253 Fig Tree
- 31204 Grenache Blanc
- 31210 Grenache
- 31208 Grenache Noir
- 120 Heather
- 31212 Macabeo
- 31201 Merlot
- 31209 Morenillo
- 31205 Muscat
- Olive Oil
- 30015 Olive Tree Var. Arbequina
- 30006 Olive Tree Var. Arboçana
- 30010 Olive Tree Var. Arroniz
- 30009 Olive Tree Var. Cornicabra
- 30001 Olive Tree Var. Empeltre
- 30013 Olive Tree Var. Frantoio
- 30012 Olive Tree Var. Fulla De Salze
- 30004 Olive Tree Var. Gordal
- 30017 Olive Tree Var. Hojiblanca
- 30008 Olive Tree Var. Koroneiki
- 30003 Olive Tree Var. Manzanilla
- 30016 Olive Tree Var. Morrut
- 30007 Olive Tree Var. Ocal
- 30014 Olive Tree Var. Panisello
- 30011 Olive Tree Var. Picual
- 30002 Olive Tree Var. Sevilencia
- 30005 Olive Tree Var. Sweet
- 31213 Parellada
- 298 Rhododendron
- 145 Southern Magnolia
- 31203 Syrah
- 239 Tree Medick
- 29 White Poplar
- 31206 Xarel·lo

- 236 Blue Jasmine
- 301 Field Bindweed
- 16 Lime
- 300 Mallow Bindweed
- 173 Mediterranean Heath
- 249 Teucer

Area 4 Visigothia

Following the corridor between the olive trees and the theater...

Area 4: "Visigothia": Noteworthy, the lime tree and some small earthen hills where we have kept some perennial adventitious plants. They are two different species of bindweed.

We have delimited this area by means of two stretched arc-shaped fences with the species, Blue Teucro and Winter Heather.

Area 5: "Al-Andalus": Many plants that came to us at the time: The fig tree, pomegranate, pistachios, rose bushes...

We have also restored the original well of the farm. It is a small well with a stone house about 20 meters deep. At the time, the water was extracted with a pulley, rope and bucket.

It was probably used, originally, to water cattle. It is curious, but that, on the other side of the ravine, we have the remains of a brick kiln. This water could be used for its manufacture as well. There is a pass, which starts from the edge of the previous holm oak, at the tip of the Iberian zone, so you can cross the ravine to see the oven more closely.

Located in front of the well, facing the rising sun, we

are in front of the farmhouse, from where it can be reached by a wide walkway, lined with trees, which we call "Les Tarosses" Walkway: We highlight, The Eucalyptus, the Alcanforero, The Bottle Tree, to the right and to the left, the Cedar, the White Poplar or the Magnolia... among others.

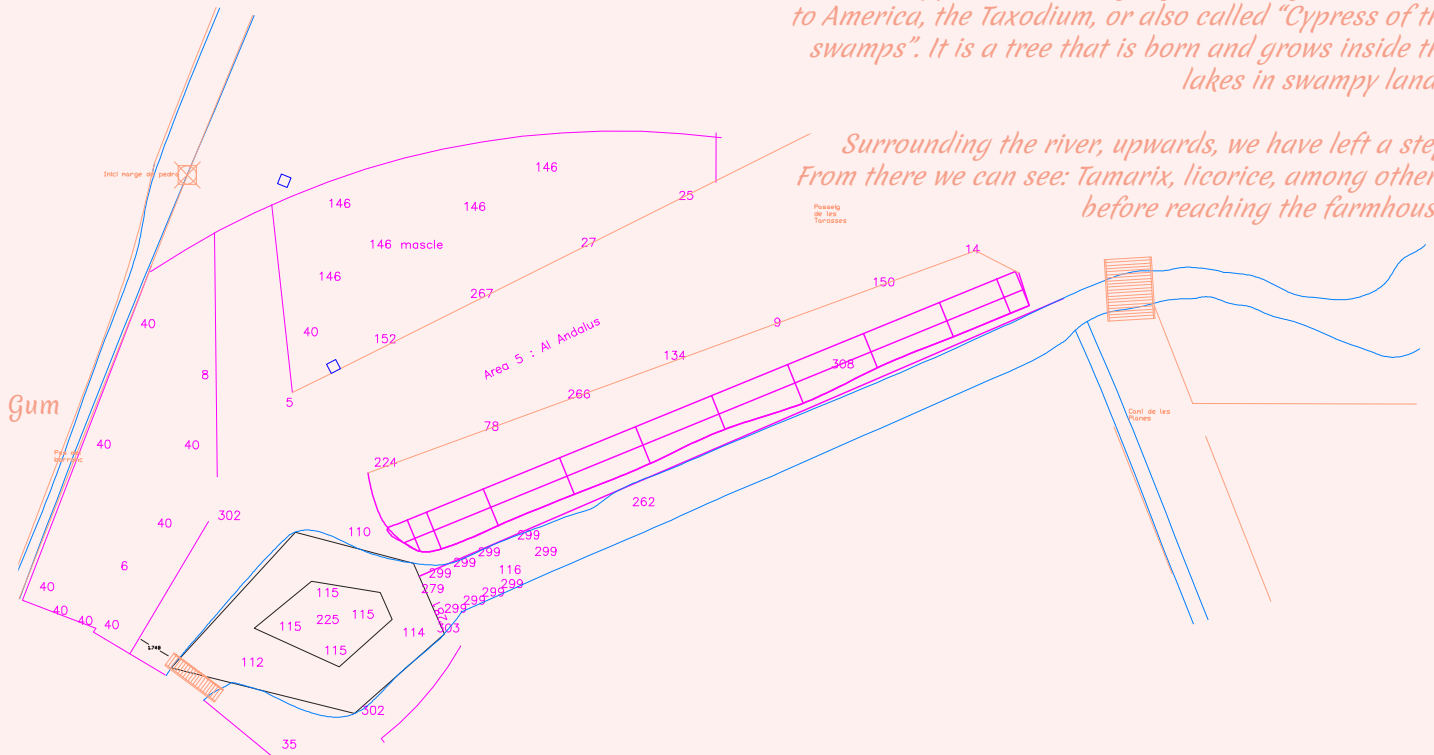

We have tried to place these alternate trees according to deciduous or perennial leaves, so that in winter, something green is always seen on each side of the road.

A river, which we have adapted as the waters flowed on a very rainy day, arrives here. Originally from zone 9, it flows into the lake.

Although not all of these aquatic plants can be classified in Muslim times, we highlight: The wisteria tunnel above the river with the water lilies in its shadow; Inside the lake: Fleur de Lis, Water Lilies, Juncos, Papyrus... And to highlight, although it is native to America, the Taxodium, or also called "Cypress of the swamps". It is a tree that is born and grows inside the lakes in swampy lands.

Surrounding the river, upwards, we have left a step. From there we can see: Tamarix, licorice, among others, before reaching the farmhouse.

- | | |
|--------------------|-----------------------|
| 279 Acorus | 25 Medlar |
| 303 Aromatic Inula | 9 Nettle Tree |
| 224 Black Alder | 14 Oriental Plane |
| 35 Bramble | 112 Papyrus |
| 115 Bulrush Rush | 146 Pistachio |
| 27 Caki | 302 Plantain |
| 116 Calla Lily | 5 Pomegranate |
| 134 Camphor Tree | 40 Rosebush |
| 267 Cedar | 6 Service Tree |
| 152 Cherry Plum | 225 Swamp Cypress |
| 8 Fig Tree | 266 Sweet Chestnut |
| 281 Fleur De Lis | 78 Tasmanian Blue Gum |
| 299 Glycine | 114 Water Lily |
| 110 Gramma | 262 Wicker |
| 150 Kurrajong | 308 Wild Garlic |

Area 5 Al-Andalus

- 89 Agave
- 297 Air Carnation
- 41 Ash Tree
- 94 Bamboo
- 251 Bladder Campion
- 179 Corn
- 57 Herb Louisa
- 144 Honeysuckle Honeysuckle
- 183 Pepper Pepper
- 189 Potato
- 181 Tomato
- 157 Wild Madder
- 223 Yucca

Area 7 Renaissance

We continue skirting the ravine:

Area 7: “Renaissance”: Basically, plants from America: Bamboo Cane, Yucca, Luisa Grass, and different vegetables such as tomatoes, peppers... Corn and even the Air Clavelina or Wire Plant that, precisely, lacks roots and lives on the air, taking advantage of humidity and dust to extract its nutrients.

We have also built a large bench, where you can see a large part of the garden while sitting comfortably, right in front of what we call “Les Comes” Path. If we continued along it, we would reach the bridge that crosses the river just in front of the farmhouse.

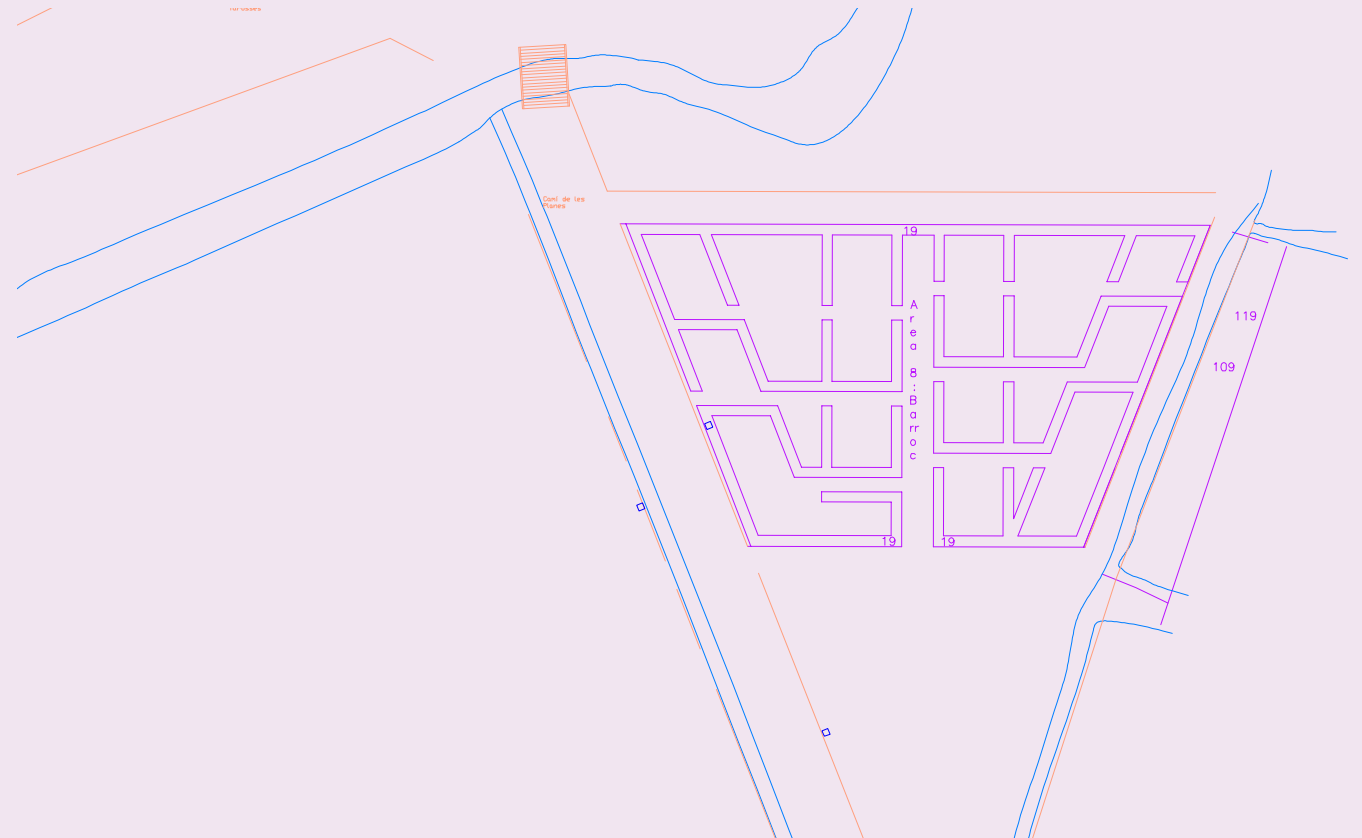

- 119 Exploding Cucumber
- 19 Mediterranean Cypress
- 109 Wild Asparagus

Area 8 Baroque

But we also have the option, long before reaching the bridge...

Area 8: "Baroque": *Something typical of the Baroque gardens were the labyrinths, mostly made of cypress fences, where the courtiers played in the "blind man's buff".*

It has three entrances or exits, depending on how you look at it.

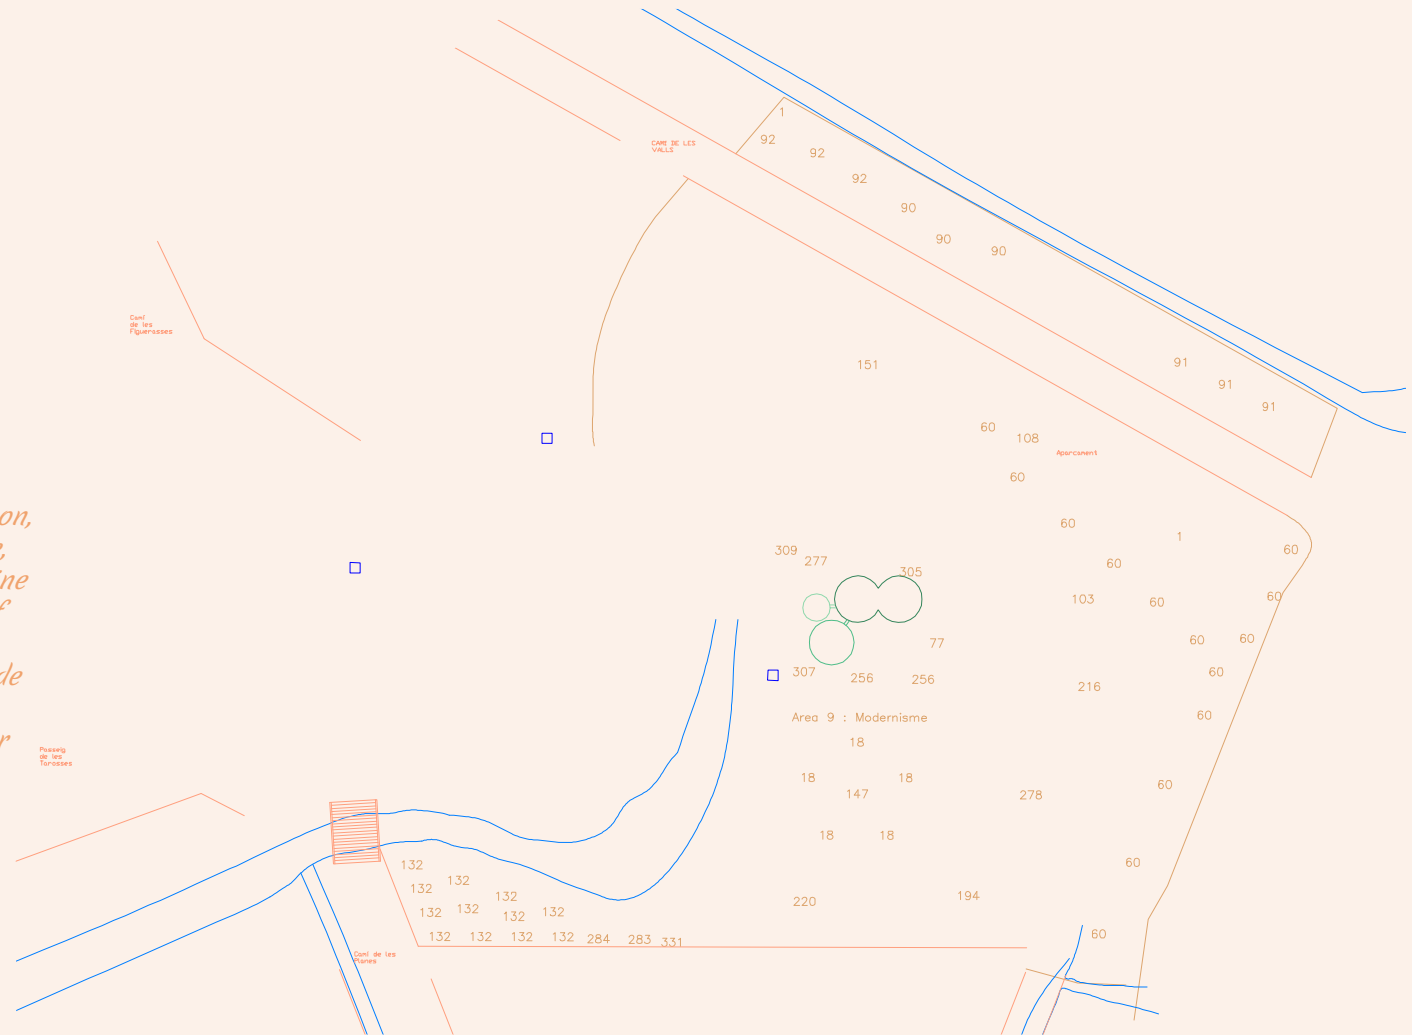

Inside, we find some rooms where potted species are planted.

Area 9: “Art Nouveau”: Remembering Gaudí, we have planted the Washingtonia. Also five little palms in the shape of a pentagon and, in the middle of this pentagon, the Artemis (*Artemisia absinthium*). We highlight these, among other plants, also the Aleppo pine, the stone pine and some succulents, such as Aloe Vera. As a center of interest, we have built some rafts with some pumps to feed the river. The whole set rests on top of a slab made of “treEncadís” (cut tiles, widely used by Gaudí). These rafts make up the Biogründl logo, seen from the air, or also from the tower of the farmhouse.

Area 9 Art Nouveau

- | | | |
|--------------------|---------------------------|-----------------------|
| 1 Aleppo Pine | 60 Daisy Flower | 278 Mexican Palm Tree |
| 91 Aloe Vera | 18 Dwarf Fan Palm | 92 Prickly Pear |
| 331 Blackberry | 151 Flats Pine | 284 Redcurrant |
| 283 Blackcurrant | 103 Judas Tree Judas Tree | 277 Stevia |
